ORACLE'S LEGACY is an inventive story about a secret civilization known as 'The Structure', which was formed in approximately 6000 BC in order to create its own tiered system of enlightenment for its inhabitants that live alongside humans.

The Structure's society is comprised of seven Houses that chase after enlightenment by achieving various levels of growth in a disclosed attempt to understand the nature of energy in modern day times. Unique tattoo-like 'energy seals' display each level as citizens face life challenges, battles, death and re-embodiment.

"Holbrook has created a memorable character in Ollie," said *ForeWord Magazine*. "She's a beautiful, opinionated, foul-mouthed, humorous, family-loving killer whose mother tells her, you have power—power people fear—power that can harm others if not used appropriately, so you must show restraint."

Ollie could be the key to finding the next leader, but she has her family to think of and a life to live. Getting involved in a violent conflict is the last thing she wants to do, and so she must remain unnoticed. As power hungry factions hunt for Ollie, however, she has no choice but to get involved. She'll do whatever's necessary to protect her loved ones.
